CSIS 2300: Lab 2

1 Tab Tasks:

1. Write a query to display the department ID and the count of employees in each department, but only for departments with 5 employees.

2. Write a query to display the employee ID, last name, and salary of employees whose salary is greater than 5000.

3. Write a query to display the last name and hire date of all employees, sorted by hire date in ascending order.

4. Write a query to find the average salary of employees in department 30.

Submission

Submit the SQL script as a text file and export your database with the data inserted into the Blackboard. Ensure that all tables and data are correctly set up before submission.
